# IBRAHIM MOHAMMED IBRAHIM

## JUNIOR MERN STACK DEVELOPER (React • Next.js • Node.js • Express.js)

Cairo, Egypt | Military Status: Exempted | Phone: +20 1149346227 | Email: IbrahimMohammedIbrahim2372003@gmail.com
linkedin.com/in/ibrahim-mohammed-a4b531164 | github.com/Ibrahim2372003

## PROFESSIONAL SUMMARY

**Junior MERN Stack Developer** with hands-on experience building full-stack web applications, REST APIs, and AI-powered features using JavaScript, TypeScript, React, Node.js, and Express.js. Experienced in JWT authentication, database integration, input validation, error handling, rate limiting, and automated testing. Also familiar with Next.js, NestJS, PostgreSQL, Prisma, and AI API integrations, with a focus on building secure and maintainable software.

## TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript | *Additional:* Python, Java
- **Backend:** Node.js, Express.js, NestJS, REST APIs, API integration, middleware, MVC architecture
- **Databases & ORM:** PostgreSQL, MongoDB, SQL, Prisma ORM, relational data modeling, database migrations
- **Security & Reliability:** JWT, authentication and authorization, input validation, rate limiting, error handling, secret management
- **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, responsive UI
- **AI Integration:** Claude API, OpenAI API, Gemini API, Vercel AI SDK, LLM streaming
- **Testing & Tools:** Vitest, React Testing Library, WAVE, axe, Lighthouse, Git, GitHub, Docker, Postman, Vercel, ClickUp

## PROFESSIONAL EXPERIENCE

**AI Backend Engineer Intern — FlyRank** Jul 2026 – Present | Remote

- Developed REST API functionality using Node.js and Express.js.
- Worked with PostgreSQL and Prisma to implement database operations and relational schema changes.
- Implemented authentication workflows, input validation, structured error handling, and user-scoped data access.
- Applied security practices including environment-variable secret management, input limits, and rate limiting.
- Worked with AI API integrations, automated tests, and backend reliability improvements.

**AI Frontend Engineer Intern — FlyRank** Jul 2026 – Sep 8, 2026 | Remote

- Built frontend features using React, Next.js, TypeScript, and Tailwind CSS.
- Developed reusable UI components, forms, and input validation.
- Integrated AI-powered features with backend services and handled loading and error states.
- Applied accessibility practices and tested frontend behavior using relevant testing and accessibility tools.

**Curriculum Creator & Technical Instructor — Trainopia** Feb 2025 – Present | Cairo, Egypt

- Created structured programming and ICT learning materials covering Python fundamentals, programming logic, and algorithms.
- Delivered technical instruction to 20+ learners, explaining programming concepts through practical exercises.
- Organized lesson plans, checklists, slides, and curriculum preparation materials using ClickUp.

## FEATURED PROJECTS

**AI SEO Audit Chat — Capstone Project** GitHub | Live Demo

*Next.js, TypeScript, Vercel AI SDK, Claude API, WebGL/GLSL, Vitest*

- Built and deployed an AI-powered SEO audit application that analyzes page content and returns structured findings through streaming responses.
- Implemented accessible AI interactions with aria-live announcements, keyboard-operable controls, visible focus states, and WAVE/axe-based validation.
- Added IP-based rate limiting, input validation, streaming timeouts, and error handling.
- Created a custom WebGL/GLSL hero with time, resolution, and mouse interaction, plus reduced-motion fallbacks; added automated tests and production-build validation.

**Job Hunt Command Center — Full-Stack Platform** GitHub | Live Demo

*Node.js, Express.js, React, PostgreSQL, Prisma, JWT, AI API integration, PDF generation*

- Built a job-search dashboard to manage applications, track status changes, and organize follow-ups.
- Developed REST API functionality with Express.js, input validation, structured error handling, and PostgreSQL persistence through Prisma.
- Implemented JWT-based authentication and user-scoped data access.
- Developed AI-assisted resume tailoring and application-report generation workflows; backend deployment and end-to-end production verification remain in progress.

**E-Commerce Web Application** GitHub

*Next.js, Express.js, Node.js, Prisma, JWT*

- Built a full-stack e-commerce application connecting a Next.js frontend to Express.js REST APIs.
- Implemented product, cart, checkout, and order endpoints with JWT authentication and authorization.
- Modeled persistent relational data for users, products, carts, and orders using Prisma.

**Polite Web Scraper** GitHub

*Node.js, Cheerio, Ajv*

- Built a Node.js scraper that respects robots.txt directives and uses rate limiting to reduce crawling disruption.
- Extracted structured HTML content and validated output using Ajv JSON Schema validation.

**Crypto Dashboard** GitHub

*React, Tailwind CSS, Recharts*

- Built a responsive cryptocurrency dashboard with market data, filtering, and Recharts visualizations.

## EDUCATION & CERTIFICATIONS

**Bachelor of Commerce — Information Systems Specialization** Helwan University | Graduated May 2025

- Faculty of Commerce and Business Administration | **Overall Grade:** Very Good (**87.22%**)

**MEAN Stack Web Developer Career Accelerator** NTI | Sep – Oct 2025

- Completed 180 technical hours + 30 freelancing hours under the Digital Egypt Youth Program.
- **Additional Programs:** InnoEgypt — Entrepreneurship (2024) | CIB Summer Internships (2023, 2024) | eYouth Course (2024)

## LANGUAGES

- **Arabic:** Native | **English:** Intermediate (technical reading and documentation)
